

Pipeline Engineering Applications Training Course

Why: To provide assistance to pipeline operators and service companies by helping them understand the capabilities and tools contained within the Pipeline Toolbox software suite. Pipeline Toolbox offers the most comprehensive suite of pipeline engineering and integrity software applications for pipeline professionals on the market. It also includes RSTRENG® the preferred software technology from PRCI for use in evaluating the remaining strength of a pipeline when exposed to corrosion.

What: Many companies have standardized their pipeline engineering and support software and have elected to provide their pipeline engineers and technicians with the Pipeline Toolbox software from Technical Toolboxes. Currently the Pipeline Toolbox is available in three separate configurations, which can be customized for corporate clients. The gas and liquid versions both contain more than 60 individual engineering, stress, hydraulic, and design calculations commonly used by pipeline professionals.

The following short-course is being offered to personnel of pipeline owner/operator companies and the service/construction companies that work for them and use the Pipeline Toolbox suite of software (liquid or gas versions).

The Pipeline Toolbox application training course is a one (1) day course which will (1) provide a basic understanding of how the 60+ modules included in the software program works, (2) summarize the techniques' benefits and limitations, (3) summarize the steps involved in performing various calculations, (4) demonstrate how RSTRENG® should be applied in the field, and an overview of the various DOT, MMS, CSA regulations and reporting forms included in the software.

Who: Technical Toolboxes, Inc. (TTI) is the exclusive Intellectual Property (IP) owner of the Pipeline Toolbox software technology. The

Pipeline Research Council International, Inc. (PRCI) funded and is the Intellectual Property (IP) owner of the RSTRENG® technology.

Instructor: Wayne Wildenradt, BSCE, Purdue University; MBA University of Wisconsin ; Texas Professional Engineer #33030, Texas Registration to offer and perform engineering services #F-2773. Forty- eight (48) years global experience in the design, engineering and project management services for oil, gas and refined product systems and components. In addition, Mr. Wildenradt was an Instructor, Economics of Pipeline Transportation at the University of Texas School of Pipeline Technology.

Price: \$725 per person for the full day. \$4,995 plus expenses for custom on-site one day course for up to twenty (20) people.

Terms and Conditions

One registration is required per person. Upon receipt of your above registration an invoice will be generated for payment. Payment is due 30 days from receipt. ½ of the course fee will be refunded provided written cancellation is received within 48 hours of the course start.

Agenda: Day 1 Program

08.15 Registration and Coffee

08.30 Introduction and overview

08:45 Pipeline Toolbox Gas Edition applications

10:15 Break

10:30 More Pipeline Toolbox Gas

11:15 RSTRENG® software operation

12:00 Lunch

13:00 Overview of Liquid applications

14:30 Pipeline Toolbox Liquid Edition applications

15:00 Break

15:15 More Pipeline Toolbox - Liquid

17:00 RSTRENG® software operation
